

meet table

sedus

New to the Sedus range:
The "meet table" standing table

The new "meet table" standing table encourages communication in a particularly elegant manner. It is ideal for informal discussions in bistros, canteens, break-out areas or as an addition to the office environment.

The sturdy frame features three integrated support legs made of chromed tubular steel and is tastefully held in place by a single joint. The upper section of one of the legs swivels allowing the table top to be folded away quickly. Meaning plenty of space can be saved when the standing table is parked.

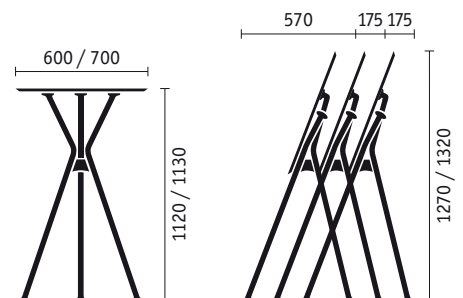

As an alternative, 19 mm particle boards with laminate coatings and ABS edges or in a fine veneer with real-wood edges are also available. The board comes in diameters of 600 and 700 mm.

The 12 mm solid core table top guarantees high resistance to abrasion and is easy to clean and is available in following colours: arctic white, pure white and dark grey. The bevel lends the black edge a particularly attractive appearance.

When combined with the "smile" standing seat, the break can be transformed into an ergonomic delight, as "smile" doesn't just look good, but also offers a simple height adjustment feature.
