Südwestmetall AG
Ferdinand-Braun-Str. 18
Heilbronn
Germany

Year completed: 2005

Furniture:
open up

Pleasantly attractive and functional workstations with the **open mind** (top right) und **open up** (bottom) office swivel chairs. Photos: © Holger Knauf

The metallic outer skin of the new regional offices not only reflects the surroundings. It is also a constructed reference of the client given that a specially developed metal weave was used for the outer layer of the facade. In the single-storey transparent building, the office landscape was to be a living area contrasting with the landscape. The white, tailor-made interior fixtures and fittings as well as the white seats form an attractive contrast to the green vegetation outdoors.
